

NAME: PA03**DATED:****AGE/SEX: 34y /M****REF BY: SELF****ECHO CARDIOGRAPHY REPORT****MITRAL VALVE :** Normal**TRICUSPID VALVE :** Thin. Opening well. No Prolapse.**AORTIC VALVE:** Tricuspid, normal, opens well.**PULMONARY VALVE:** Normal. Normal 'EF' slope. Normal 'A' wave. No midsystolic notch.**M-MODE PARAMETERS**

MEASUREMENTS			(NORMAL VALUES)
Aortic root diameter	25		(20-37mm)
Left Atrial diameter	27		(19-40mm)
Left Ventricular ED Dimension	47		(33-55mm)
Left Ventricular ES Dimension	29		(22-40mm)
Inter Vent. Septum thickness D	10		(06-11mm)
LV posterior wall thickness D	7		(06-11mm)
LEFT VENTRICLE FUNCTION INDICES			NORMAL VALUES
Ejection Fraction	60 %		(55-74%)
Fractional shortening	32.5%		(28-40%)

ON INTERROGATING WITH PULSE & CONTINUOUS WAVE DOPPLER IT WAS FOUND THAT THERE IS:-

No Aortic regurgitation.
No Pulmonary regurgitation present.
No gradient across LVOT
Mitral inflow. E = 110cm/s, A= 88cm/s
Aortic Velocity = 1.47 m/s
Pulmonary velocity = 1.1m/s

OTHERS

IAS/IVS intact
No evidence of any mass / vegetation
No effusion
No LA/LV clot

FINAL IMPRESSION: -

- **No RWMA**
- **EF- 60% normal LV function**
- **Mild TR.Pasp= 23 mmHg.**
- **Normal RV function**

Consultant DM Cardiologist
