

Name: PA04	Date: 07-05-2024
Age/ Sex: 29Y/ Female	Ref. by:

ULTRASOUND WHOLE ABDOMEN

LMP: 28.04.2024.

Liver: is normal in size (~13.8cm), outline and **showing diffusely increased parenchymal echogenicity.**
No focal lesion is seen. No intrahepatic biliary dilatation seen. Hepatic veins are normal. Portal vein is normal.

Gall bladder: Well distended. **A large echogenic calculus measuring ~ 32.6mm size with dense posterior acoustic shadow is seen in its lumen.** No e/o any GB wall thickening or pericholecystic collection. Proximal CBD is normal in caliber.

Pancreas: is normal (head and body) in bulk and echogenicity, tail is obscured due to overlying bowel gases. MPD is not dilated.

Spleen: is normal in size (~9.9cm), outline and echogenicity. No focal lesion seen.

Right kidney: is normal in size (~9.5cm), shape and outline with normal cortical echogenicity. Corticomedullary differentiation is maintained. No calculus or hydronephrosis is seen.

Left kidney: is normal in size (~11cm), shape and outline with normal cortical echogenicity. Corticomedullary differentiation is maintained. No calculus or hydronephrosis is seen.

Urinary Bladder: is well distended and shows normal wall thickness and anechoic lumen.

Uterus: is normal in size, shape and echotexture. No focal, /diffused lesion seen.
Endometrium is measuring ~8.5mm in thickness.

B/L ovaries are bulky (RO ~ 15cc and LO ~ 10cc) with e/o multiple peripherally arranged subcentimetric (~ 3-9mm) size follicles are seen with thick echogenic stroma- giving PCOD morphology.
No lymphadenopathy / free fluid seen.

IMPRESSION:

- **Grade I fatty liver. (Adv: LFT & Lipid Profile).**
- **Cholelithiasis.**
- **B/L ovaries are bulky with e/o multiple peripherally arranged subcentimetric follicles are seen with thick echogenic stroma- giving PCOD morphology.**
(Adv: Complete hormonal assay and clinical correlation).

To correlate clinically with other investigations to R/O undetected pathology or other possibility & its significance.
