REF. BY:

=====

INVESTIGATION: ULTRASOUND WHOLE ABDOMEN

=====

Liver: is normal in size (~11.2cm), outline and **showing diffusely increased parenchymal echogenicity**. No focal lesion is seen. No intrahepatic biliary dilatation seen. Hepatic veins are normal. Portal vein is normal.

Gall bladder: Well distended. No e/o any calculus / mass seen in its lumen. No e/o any GB wall thickening or pericholecystic collection. Proximal CBD is normal in caliber.

Pancreas: is normal (head and body) in bulk and echogenicity, tail is obscured due to overlying bowel gases. MPD is not dilated.

Spleen: is normal in size (~7cm), outline and echogenicity. No focal lesion seen.

Right kidney: is normal in size (~10.5cm), shape and outline with normal cortical echogenicity. Corticomedullary differentiation is maintained. No calculus or hydronephrosis is seen.

Left kidney: is normal in size (~10.3cm), shape and outline with normal cortical echogenicity. Corticomedullary differentiation is maintained.

Moderate hydroureteronephrosis is seen (Proximal ureter ~ 8 mm in SAD) however no obvious calculus is seen in PCS and visualized proximal ureter -?Distal uretric calculus.

Urinary Bladder: It is well distended and shows normal wall thickness. **Multiple moving echoes are seen in its lumen- ? UTI.**

Prostate: It is normal in size (Vol~15cc), shape and echotexture.

No lymphadenopathy / free fluid seen.

Bowel loops are normal in calibre.

IMPRESSION:

- **Grade I fatty liver. (Adv: LFT & Lipid Profile).**
 - **Moderate left HDUN-? Distal ureteric calculus.**
 - **Multiple moving echoes in its lumen- ? UTI.**
- (Adv: NCCT-KUB, RFT & Urine R/E for further evaluation if clinically indicated).**

Please correlate clinically and with other relevant investigations.
